## Operator Training Programs

Raymond Storage Concepts, Inc. (RSCI) provides the precision forklift related training programs you need to increase productivity and efficiencies. Immediately. No one is more committed to training your teams for success, and keeping your operations running smoothly, than RSCI. Which is why we offer the most comprehensive set of operator training programs in the industry.

Our first time and continuing educational courses are proven effective every day. They enable you to establish organizational benchmark safety and performance standards through innovative instruction techniques that result in successful deployment of best practices when using material handling equipment.

### Train the Trainer Programs

RSCI trains one or more of your employees to become operator safety trainers. Each class includes the entire Safety on the Move program. Trainers will be expected to understand the applicable OSHA standards. Trainers also get to participate in a live classroom setting to see how high-quality training is conducted. Class size is limited to six or fewer forklift trainers in order to give each trainer lots of personal attention.

### Safety On the Move

The Raymond Corporation's Safety on the Move operator training program is a comprehensive lift truck safety training program that uses interactive discussions and demonstrations of safety principles, video-based examples and practical hands-on sessions. Trainees are able to both see and experience for themselves the important concepts of lift truck operation that are essential for a safe, efficient warehouse.

# SAFETY ON THE MOVE®

### Operator Training

Operators that know how to use their equipment make fewer mistakes, leading to greater accuracy and efficiency. Meet OSHA compliance standards and improve your bottom line by reducing accidents, equipment downtime and product damage.

- » Powered Industrial Lift Trucks
- » Battery Changing & Charging
- » Ariel Work Platform (Scissor Lifts)

### Virtual Reality Simulator

The Virtual Reality Simulator offers a more effective learning experience for operator students and a more efficient teaching tool for instructors. With multiple forklifts included in the software, you can quickly switch between models for instruction on different forklifts in your fleet. Each one comes with a series of guided lessons that increase in complexity and build upon principles learned in earlier lessons.
